Assunto: How to direct an old domain name for our current domain ?

Hello Francisco,

Yes this is possible, I believe what you are looking for is an IRO:

<http://www.FutureQuest.net/Services/IR/#IRO>

An IRO will enable emmerich.org.br to transparently redirect to your main package (emmerich-afe.org) and display the exact same content. IROs also overlay your email accounts, as explained here:

<https://service.FutureQuest.net/kba58>

There are some limitations for IROs, which are noted here:

<http://www.FutureQuest.net/Services/IR/#Limits>

The cost of an IRO is a one-time setup fee of \$20.00, with no further charges. You can place an order for an IRO from your QuestAdmin login:

<https://Secure.QuestAdmin.net/>

(Click the 'Services' tab, then select 'Place a New Order'. Scroll down and click 'Internal Redirection/Overlay (IRO)'; for 'Domain Name' enter emmerich.org.br, and select emmerich-afe.org as the 'Full Hosting package to Overlay', then hit 'Continue' to proceed with your order.)

And yes, our name servers are ns1.FutureQuest.net and ns2.FutureQuest.net.

If anything is unclear, or you would like more information on the details, please contact us.

Kind regards,

Mike

Assunto: How to direct an old domain name for our current domain ?
Prioridade: Alta

Dear Sirs,

Our Association (Associação Família Emmerich) used for many years the domain: emmerich.org.br

However, due to some problems that occurred last year, we were not able to use the domain: emmerich.org.br

So, we got the domain: emmerich-afe.org , we are using it, and you are our website hosting.

Today, we have jus solved the problems with the domain: emmerich.org.br and now we are also able to use the domain emmerich-afe.org

In the next year we are planning to use only the domain emmerich.org.br, but now we would like to have the two domains active (emmerich.org.br and emmerich-afe.org) , and keep our site as it is now.

But we want that if someone write: <http://emmerich.org.br>, this will direct it to <http://emmerich-afe.org>

Is it possible?

What are the DNS severs that we have to inform to the DOMAIN Register company REGISTRO.BR (that give as the use of the the domain: emmerich.org.br).

We have already tried to inform that the DNS servers are ns1.futurequest.net and ns2.futurequest.net, but they inform us that these servers were unknown domains (We think that it is because it is necessary to configure our site in your host to also accept the domain emmerich.org.br).

Thank you very much for your help,

Yours sincerely,

Francisco Guilherme Emmerich
